Portfolio:  Portfolio - Yuriy Kobylyatskiy

Professional Summary

Senior / Lead Unity Developer, 15+ years in Game Development, 18+ years in Software Development.

Experienced in developing and supporting **mobile** and **desktop games** for **iOS**, **Android** and **Steam** platforms. Specialized in **gameplay systems**, **LiveOps**, **remote content delivery**, **SDK integrations**, **optimization**, **technical architecture** and **production tooling**.

In addition to development, I was involved in technical leadership of teams, architecture design, development process organization, hiring, and technical audit of projects.

Selected engineering cases

Performance & Optimization

- Reduced iOS build size from 200 MB to 41.7 MB
- Reduced Android build size to 48.2 MB
- Reduced memory consumption from 1.7 GB to 900 MB
- Eliminated freezes and crash issues on large narrative projects

Infrastructure

- Reduced CDN expenses from \$4000–5000/month to ~\$400/month
- Improved application loading speed by approximately ~80%

Security & Reliability

- Implemented anti-cheat protection for client-server gameplay by securing critical gameplay variables against memory manipulation, eliminating a publicly disclosed Cheat Engine exploit.

Production Pipeline

- Built AI-character assembly pipeline for Comix Zero
- Reduced new enemy setup time from several weeks to approximately 2 hours
- Enabled non-programmers to configure and assemble basic NPCs

Leadership

- Managed technical teams up to 150 specialists
- Participated in hiring, mentoring and technical audits
- Led architecture and delivery of 15+ projects

Core Competencies

Unity Development

- Unity 2D / 3D
- Gameplay Programming
- UI Programming
- ScriptableObject
- DOTween
- Spine
- Steamworks
- Custom Editor Tools

AI & Game Systems

- Behavior Trees
- Behavior Designer
- Combat Systems
- Save Systems
- Inventory Systems
- Character Controllers
- Kinematic Physics
- Cutscenes
- Anti Cheat

LiveOps & Monetization

- Daily Bonus
- Reward Systems
- Referral Systems
- Promo Codes
- A/B Testing

- Remote Configurations
- Content Delivery

SDK Integrations

- PlayFab
- Firebase
- RevenueCat
- AppsFlyer
- Amplitude
- Google Analytics
- Google AdMob
- Google Play Services
- iOS Game Center

Optimization

- Memory Optimization
- Build Size Optimization
- Performance Optimization
- Crash Reduction
- Asset Delivery Optimization

Graphics

- Custom Unity shaders
- Material customization
- Gameplay VFX implementation

Leadership & Architecture

- Technical Design
- Architecture
- Team Leadership
- Mentoring
- Estimation
- Technical Documentation

Languages

- Russian — Native
- Ukrainian — Fluent reading and comprehension, conversational
- English — A2 (Elementary), actively studying

Professional Experience

Unity Developer

Bear Games

Feb 2025 – Present

Project: Comix Zero (Windows / Steam)

Responsibilities and achievements:

- Developed AI systems using Behavior Trees
- Implemented combat systems and character abilities
- Created interaction mechanics and platforming systems
- Developed internal Unity tools and editors
- Integrated Steamworks build and deployment workflow
- Implemented gameplay configuration framework using ScriptableObjects
- Developed lightweight custom shaders for gameplay and UI effects, improving visual feedback while maintaining performance.

Technologies:

Unity, C#, Behavior Designer, Steamworks, DOTween

Lead Unity Developer

Readable Games (ILARK LTD)

Aug 2023 – Jan 2025

Mobile visual novel platform (iOS / Android)

Responsibilities and achievements:

- Led Unity development team
- Implemented LiveOps systems and player engagement features
- Integrated PlayFab, Firebase, RevenueCat, AppsFlyer and Amplitude
- Built remote content delivery pipeline
- Automated content testing
- Performed major memory and build size optimization
- Designed CDN automation workflows

Technologies:

Unity, PlayFab, Firebase, RevenueCat, AppsFlyer, Amplitude, CDN

Unity Developer

BiniBambini

Mar 2023 – Aug 2023

Project: Bini Beehive

Responsibilities:

- Designed gameplay architecture
- Developed core gameplay systems
- Implemented tutorial systems
- Created internal tools and editors
- Integrated monetization and analytics SDKs

Unity Developer

Playgendary

Jul 2022 – Feb 2023

Responsibilities:

- Gameplay development
- UI implementation
- Optimization
- Monetization SDK integration
- Feature development for casual and hypercasual projects: DIY Projects, Bowmasters, Despicable Bear etc.

Unity Developer

Nexters

Feb 2022 – Jun 2022

Project: Puzzle Odyssey

Responsibilities:

- Feature development
- Daily bonus systems
- Player assistance systems
- Technical documentation

C++ Developer

Bear Games

Aug 2021 – Feb 2022

Responsibilities:

- Mobile game systems development using C++17
- Technical documentation
- Engine-level gameplay features

CTO

Bear Games

Dec 2013 – Jul 2021

Responsibilities:

- Led technical department
- Managed architecture and engineering processes
- Built CI/CD infrastructure
- Organized development workflows
- Participated in hiring and project audits
- Managed teams up to 150 specialists

Technologies:

Unity, C#, Flash, Jenkins, Puppet, FreeIPA, Zabbix

Lead Game Developer

Crystal Clear Soft

Sep 2011 – Dec 2013

Responsibilities:

- Led development team
- Designed game architecture
- Developed client and server systems

Technologies:

Unity, C#, PHP, MySQL, Flash

Lead Full Stack Web Developer

WonderKiD Studio

Apr 2007 – Sep 2011

Responsibilities:

- Full-stack web development
- Database design
- Team leadership
- Hosting and deployment

Technologies:

PHP, JavaScript, SQL, MySQL, Flash

Technologies

Languages

C#, C++17, PHP, JavaScript, SQL, HTML, CSS

Backend & Data

PlayFab, Firebase Realtime Database, Firebase Remote Config, PostgreSQL, MySQL, Redis

CI/CD & Automation

Jenkins, TeamCity, Bash, Cron, Rclone

Tools

Git, Bitbucket, GitHub, SVN, Mercurial, Xcode basics, macOS basics, Android Studio/Logcat, Unity/Memory Profiler, ChatGPT, Codex.

IDE

Unity, Rider, Visual Studio, PhpStorm, IntelliJ IDEA

Platforms

iOS, Android, Windows, Steam

Education

Computer Academy STEP

Year of graduation: 2007

Specialization: **Software Development**

Additional areas:

- Network Administration
- Windows Administration
- Computer Graphics
